Getting the Best Out of Your Tyres

IMPORTANT NOTICE

This catalogue contains brief pattern descriptions and size-range of Bridgestone tyres for Asia and Oceania region, except Japan and China. As this catalogue contains only brief descriptions on tyres, and tyres are catered to different markets in the region, please consult with our sales representatives or distributors before ordering these products. We look forward to assisting you so that your customers can get the most out of our high quality products.

* Due to the constant advancement in tyre technology, the contents of this catalogue are subjected to change without prior notice.

No part of this catalogue may be reproduced in any form or by any electronic or mechanical means, including information storage and retrieval devices or systems, without the prior written permission of Bridgestone Asia Pacific Pte Ltd.

DISCLAIMER:
All information, illustrations and photos in this catalogue are correct at time of printing and are for reference only.

SERVING SOCIETY WITH SUPERIOR QUALITY

ABOUT BRIDGESTONE

At Bridgestone, our goal is to become a truly global company and to achieve “Dan-Totsu” (the absolute and clear leader in Japanese) in our industries. The roots of our company date back to 1931, when Bridgestone Tire Co., Ltd. was established in Kurume, Japan. Anticipating the future potential of tyres for passenger cars and the international development of the business, founder Shojiro Ishibashi used an English translation of his surname for the name of the company.

As Japan's automobile industry grew, the Bridgestone Group expanded its business to become Japan's largest tyre manufacturer. The company actively expanded overseas, particularly in Asia. In 1988, the company acquired The Firestone Tire & Rubber Company. This transformed Bridgestone into one of the world's largest tyre and rubber companies.

Headquartered in Tokyo, Bridgestone supplies its products to over 150 nations and territories around the world.

BRIDGESTONE IN ASIA PACIFIC

In the Asia Pacific region, Bridgestone locates its regional headquarters in Singapore, overseeing the operations of tyre production and sales facilities, as well as supplying its products across more than 25 countries in the region.

Our presence in Asia Pacific includes manufacturing plants, sales companies, proving grounds, training centres, and technical centres. Bridgestone has over 23,000 employees in this region (as of 2017).

GLOBAL OLYMPIC TOP SPONSORSHIP

This Olympic partnership is an opportunity to showcase our company's commitment to community service, social responsibility, environmental stewardship and sustainability— all tenets of the Olympic Charter and the International Olympic Committee's Agenda 2020 that mirror Bridgestone's core values.

For over 80 years, Bridgestone has been dedicated to helping customers on their journeys with a passion and innovation delivering reliability, safety and performance. And, from 2014 as an official Olympic Worldwide Partner, we are proudly supporting athletes the world over on their journey to the Olympic Games.

CORPORATE PHILOSOPHY

The Bridgestone Group's mission is based on the words of its founder: "Serving Society with Superior Quality." We aspire to offer the best for our customers and to society, not only in terms of our products, services and technology, but in all of our corporate activities. Our commitment to quality stems from a passion for improving the safety and lives of people everywhere.

To fulfil this mission, the Bridgestone Group has used the concept of "Foundation" to demonstrate the sustained commitment of employees to provide its customers with world-class products and services and to serve the communities where Bridgestone does business.

In 2011, the Bridgestone Group refined the Bridgestone Essence (corporate philosophy), and the Environmental Mission Statement and the Safety Mission Statement were also refined consecutively. In 2015, we completed the Bridgestone Essence Framework with these two statements and formulation of the Quality Mission Statement. Going forward, we will further develop and advance the Group's global activities based on the Bridgestone Essence Framework.

Quality Mission Statement
Creating Customer Value & Trust
Our focus is achieved through innovation and kaizen.

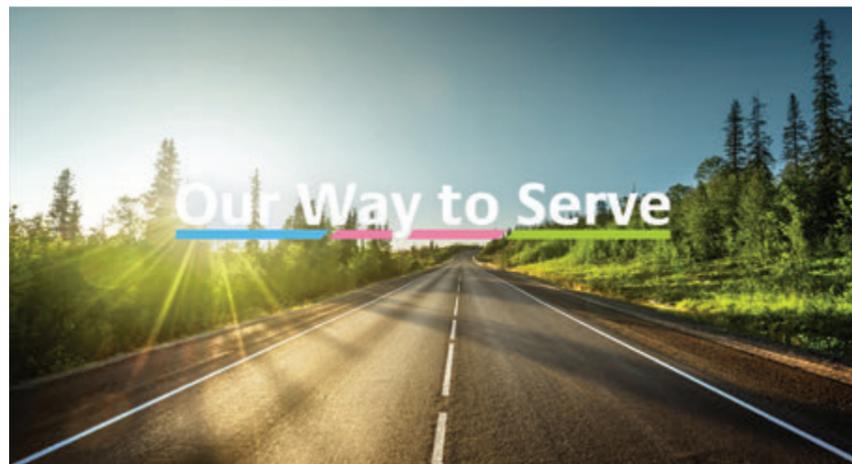

Environmental Mission Statement
To help ensure a healthy environment for current and future generations...

Safety Mission Statement
Safety First, Always
At Bridgestone, we make safety a business value. Ensuring a safe working place for all is management's responsibility.

GLOBAL CSR COMMITMENT OUR WAY TO SERVE

VISION Understanding that Serving Society with Superior Quality is our heritage and our mission, and embracing our responsibility to future generations as a global leader in our industries, Bridgestone and its teammates around the world employ innovation and technology to improve the way people move, live, work and play.

Mobility

To accelerate sustainable mobility innovations through advanced technologies and solutions.

People

Employ our strengths to support our communities and enhance the way people live, learn and work.

Environment

To help ensure a healthy environment for current and future generations.

BRIDGESTONE TECHNOLOGY & INNOVATION

Effort for Natural Rubber Sources
"Continuous utilization and productivity improvement" and "diversification" of natural rubber sources

Technology to Control Molecular Structures - NanoPro-Tech™
"Maximizing benefits of tyre materials to meet various applications"

Sensing Technology of Tyres and Road Surfaces
Tyre and road surface condition sensing to support the safety of driving experience

Bridgestone's Run-Flat Tyre Technology
Continue driving up to 50 miles after a puncture

Bridgestone's Non-Pneumatic Tyre Technology "Air Free Concept"
Non-pneumatic tyres that support the weight using a unique structure of spokes

Bridgestone's Mining Solution Technologies
Solutions to support customers' business

WE DO MUCH MORE THAN GREAT TYRES.

Tyres account for about 80% of Bridgestone Group sales. The remainder derives from a broad range of industrial and consumer products and services, together with bicycles and other sporting goods.

COMFORTABLE RELIABILITY

TURANZA seeks to achieve the high-level balance that luxury car owners seek, combining comfort, security, driving performance, and advanced technology. Utilising cutting-edge tyre technology to achieve the ideal driving conditions for the drivers of world-class luxury cars, TURANZA will constantly improve the drivers' performance.

EXCEPTIONALLY SMOOTH RIDE SUPERIOR QUIETNESS ASSURED CONFIDENCE

**TURANZA TYRES
ARE ENGINEERED TO
PROVIDE A SMOOTH,
COMFORTABLE AND
RELIABLE RIDE IN
ANY CONDITION**

TURANZA touring tyres are built by perfectionists, for perfectionists and achieve performance that luxury vehicles demand. Providing balance between a comfortable silence and stability, TURANZA is ideal for drivers who want a smooth driving experience.

TURANZA is focused on improving comfort without sacrificing handling. Our quiet ride technologies minimise road noise through an advanced noise-canceling tread design. Innovations in handling capabilities enhance on-road stability and provide improved resistance to hydroplaning. Improvements in rubber compounds make the TURANZA more durable by enhancing the life of the tread.

You don't have to compromise performance for a more comfortable ride. TURANZA delivers both. Our innovations and attention to detail make this tyre ideal for luxury vehicle owners and perfectionists alike.

Take a Journey.

It's not the distance travelled, it's the quality of experiences life reveals while travelling on Turanza. Take a Journey is a tribute to those unforgettable moments of premium comfort.

COMFORT ABOVE ALL.

For a Quieter, Safer and Smoother journey.

Experience a quieter, safer and smoother journey. The new TURANZA T005A is engineered with Bridgestone's advanced technology to take care of your needs on the road. When you journey with the world's most trusted tyre brand, you know you'll always arrive at your best.

BRIDGESTONE'S BEST JUST GOT BETTER.

QUIETER

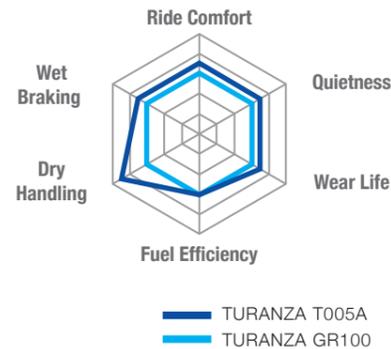

With minimal tyre noise, you can relax in total peace or stay completely focused on the journey ahead.

SAFER

Less to worry, more to enjoy. The new TURANZA T005A is designed to provide a better grip on roads to keep you safe, especially in wet conditions.

SMOOTHER

Enjoy a more comfortable and more stable drive on highways with reduced vibrations and road noise.

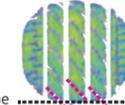

QUIETER

Variable Pitch

Randomised pitch variation is applied to each tread block (the inside shoulder, centre and outside shoulder) to reduce pattern noise.

High-Angle Sipes

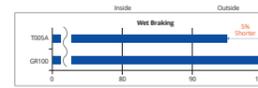

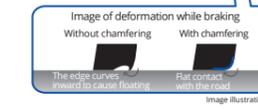

The angle of the sipes to the contact line has been fine-tuned to soften tyre impact on the road, leading to a less pronounced pattern noise.

SAFER

Chamfering

Rounded sipe edges prevent tyre deformation and ensure a flat contact with the road, improving braking performance.

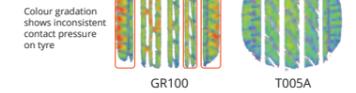

Test Conditions: Vehicle: Toyota Camry 2.5i 2016, Location: Thai Bridgestone Proving Ground, Speed: 80km/h - 120km/h, Water depth: 2mm

SMOOTHER

Optimised Contact Shape

Improved design ensures the tyre applies consistent contact pressure on the road, reducing shock and impact noise for better comfort.

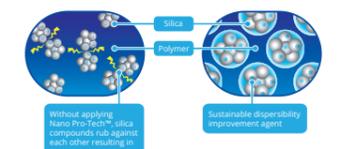

Reinforced Sidewall

A stiffer sidewall (except for tyres with a low aspect ratio) reduces damping and improves comfort.

New Compound

Nano Pro-Tech™ and a compound agent are used to strengthen the bond between silica and polymer, increasing their contact area. This reduces heat generation and energy loss, leading to better wet performance.

TWO DISTINCT PERSONALITIES UNITED IN THE PURSUIT OF PURE DRIVING PLEASURE

Communicating the joy of sport driving is core to the POTENZA brand. In fulfilling this mission, POTENZA S007A and POTENZA Adrenalin were developed along distinctly different paths – the difference lying in driving styles. Adrenalin, has been designed to handle best when performing in dry conditions. With its optimal balance of function and performance, the S007A is always stable, no matter what the surface or how extreme the cornering. Drivers should make their selection with this difference in mind.

ENJOY THE NEW LIMIT

POTENZA TYRES DELIVER ULTIMATE HANDLING & RESPONSE, ALLOWING YOU TO TAKE SHARP TURNS WITH MAXIMUM PRECISION

I don't compromise. And I never give up. In driving, there is an enjoyment that exists for me alone – that of exhilaration and challenge. It is not a struggle, but a challenge for my own heart to pursue. The boundaries and limits I had imagined as real, suddenly all dissolve away. It is at this moment that the real pleasure of driving rushes through my entire body. It is this moment of bliss that only lovers of sports driving know. POTENZA, taking you to the new limit of sports driving.

S007A: ULTIMATE GRIP AND RESPONSE

“ *I think drivers will realise just how far the tyre has evolved, most noticeably when they are cornering at high speeds.* ”

Beginning with a compound to maximize adhesion with the road, the Potenza S007A was designed for the drivers of sports cars who are seeking enhanced handling. We achieved stable cornering control in both wet and dry conditions. The tyre reacts instantaneously according to the driver's intention and they will feel the increased sensitivity during cornering whilst maintaining the desired level of grip.

ADRENALIN: PURE INTERACTION WITH THE ROAD

“ *When developing Adrenalin, we strived to maximise the amount of information the tyre relayed to the driver about changing road conditions, and how truthfully it responded to steering.* ”

It is worth noting that Adrenalin was developed in collaboration with former Formula One driver Stefano Modena, whose precision reflexes and split-second sensibilities demand the highest level of technical performance. I'm proud to say that Adrenalin meets these demands with a thrill from the moment you start moving.

THE ANATOMY OF PERFORMANCE

Incorporating technologies such as 3D-M SHAPED SIPES and the KEVLAR FLIPPER & HYBRID SPIRAL, every detail of this high-performance tyre has been calibrated to deliver maximum control and response, on both dry roads and wet. Beyond an exhilarating drive, the POTENZA S007A will also go the extra mile with enhanced durability. Now that is the true anatomy of performance.

DRY HANDLING

LOW ANGLE SIPES

Sipes are positioned at low angles for enhanced control, especially during cornering.

WET BRAKING

CHAMFERING

By rounding each block, tyre deformation is prevented. This results in a flatter contact area while braking, which shortens the braking distance.

DRY HANDLING

KEVLAR FLIPPER + HYBRID SPIRAL

A high-stiffness material is inserted into the tyre to reinforce the tyre interior and prevent excessive movements. This increases tyre sensitivity and grip, especially during high-speed driving.

DRY HANDLING

WEAR LIFE

Each sipe is shaped into a 3-dimensional letter "M", which reinforces block stiffness and prevents unnecessary block movements when the tyre is in motion. This prolongs tyre life and provides additional control on the road.

DRY HANDLING WET BRAKING

SMOOTH RIB

The centre rib is stiffened to improve the stability of the tyre and achieve an instantaneous response.

WET BRAKING WEAR LIFE

OPTIMISED STRUCTURE

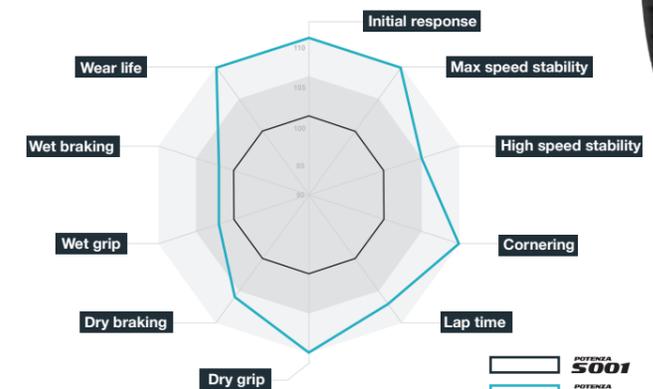

The combination of a Multi Round Block and Optimised Crown Shape ensures higher contact pressure for better grip during braking on wet roads, as well as uniform contact pressure to prolong tyre life.

PERFORMANCE COMPARISON

KEVLAR FLIPPER + HYBRID SPIRAL
Increased grip at high speeds

OPTIMISED STRUCTURE
Maximised grip on wet roads

3D-M SHAPED SIPES
Prolonged tyre life

EXPERIENCE MAXIMUM DRIVING PLEASURE AND EXCITEMENT

POTENZA Adrenalin RE003 is built with an optimal mix of powerful traction, handling stability and quick initial response on dry, and also sure handling and braking on wet conditions.

Dry-handling Performance

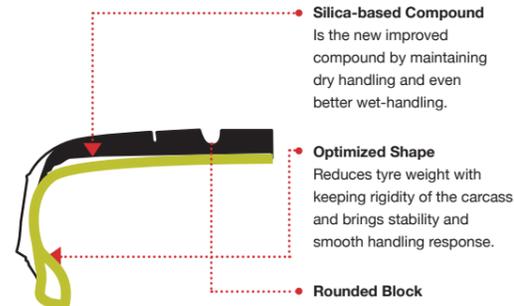

- 1 WIDE CENTER RIB**
Driving Excitement & Pleasure
 - Precise handling
 - Precise cornering
- 2 CURVED GROOVE-WALL ENFORCEMENT**
Superb Performance in Dry Cornering
 - Precise cornering
- 3 CONNECTION BLOCK**
Improved Overall Performance
 - Powerful traction
 - Upgraded handling stability
- 4 TRIPLE & HALF GROOVE**
Better Cornering & Braking
[Both Dry & Wet Conditions]
 - Optimised rigidity
 - Quick initial response
 - Improved road contact surface
 - Less irregular wear

- More consistency in road contact pressure than RE002 (Stable contact patch)
- Improvement of traction
- Improved cornering performance, ensures better wet braking and even reduces irregular wear

Wet-handling Performance

- 5 PULSE GROOVE**
Traction & Stability for Maximum Control
 - Better drainage
 - Anti-hydroplaning
- 6 SILICA-BASED COMPOUND**
Balancing in Both Performance & Comfort
 - New & improved compound
 - Enhanced handling performance [Both dry & wet conditions]

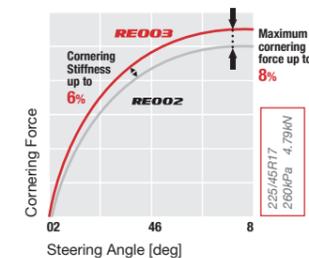

- **Silica-based Compound**
Is the new improved compound by maintaining dry handling and even better wet-handling.
- **Optimized Shape**
Reduces tyre weight with keeping rigidity of the carcass and brings stability and smooth handling response.
- **Rounded Block**
Is new shape that contributes for stable contact pressure and reduce the risk of irregular wear.

Special Design Features

- 1 Convex Original Character**
WITH AERODYNAMIC PERFORMANCE
- 2 Adrenalin "A" Mark**
- 3 Size Description**
EASILY VIEWABLE SIZE DESCRIPTION WHICH FITS WELL WITH SIDE DESIGN
- 4 Suffix**
WITH SENSE OF UNITY
- 5 Dynamic Line Graphic "III" Image**

Higher Cornering Stiffness and power than RE002

Better Dry Handling with RE003

Better Braking Performance Than RE002 in Dry and Wet

FOR TOMORROW, OUR CHILDREN, OUR PLANET

Our planet is crying out for respect. However, there are still many among us who do not think this way. But in the future, we believe those who respect the environment will command their own respect.

Bridgestone understands that decreasing carbon dioxide (CO₂) is a key to save our planet and that 87% of a tyre's CO₂ emissions are released during use. That's why we applied advanced technology to realize a new kind of tyre — one that combines a reduction in emissions with excellent safety performance. Try it for yourself and drive for a better future.

MORE SAVINGS, MORE ROAD

ECOPIA TYRES ARE ENGINEERED FOR LESS ROLLING RESISTANCE, MAKING ANY CAR MORE FUEL-EFFICIENT

Go further on less energy using the breakthrough fuel-efficient tyre performance technologies of ECOPIA tyres. They're engineered for the eco-conscious and cost-conscious driver, delivering low rolling resistance - meaning the tyre minimizes wasted energy, reducing fuel consumption and carbon emissions. Our ECOPIA line is designed to enhance fuel economy while delivering performance and a smooth ride. Explore our entire range of ECOPIA environmentally conscious, fuel efficient tyres for your car, hybrid, SUV or crossover.

ECOPIA tyres return more energy back to the tyre instead of generating heat and compromising fuel efficiency. ECOPIA tyres help channel water away from the tyre through circumferential grooves, which improve resistance to hydroplaning and increase wet traction.

MORE SAVINGS

The ECOPIA tyre is designed with fuel and environmental savings in mind. Because it has a lower rolling resistance than other tyres, ECOPIA tyres have a greater fuel efficiency, leading to greater cost savings and lower CO₂ emissions.

MORE ROAD

The advanced technology of ECOPIA gives you smoother acceleration, a more stable driving experience and better braking performance, which all add up to less wear-and-tear on your tyres. Put that together with its fuel and CO₂ savings, and you'll find the ECOPIA tyre offers a more sustainable, eco-friendly motoring experience - *which means more road for all of us.*

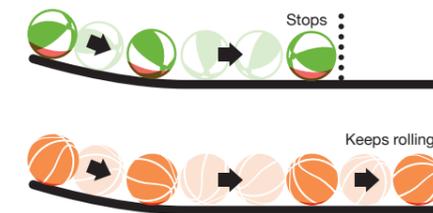

Rolling Resistance Explained

What is Rolling Resistance?

Rolling Resistance is the force that you need to overcome when you roll an object. The more rolling resistance it has, the more force is needed to overcome it.

What is the difference between a Low Rolling Resistance tyre and conventional tyre?

Tyre deformation generates friction between the rubber and the road, which causes excess Rolling Resistance. ECOPIA tyres roll more easily than conventional tyres because their reduced tyre deformation means less resistance and less energy loss.

A basketball deforms less, reducing friction so it rolls easier than a beachball.

Do Low Rolling Resistance tyres help to lower the fuel consumption?

Yes, Rolling Resistance tyres determine 20-30% of a vehicle's total fuel consumption. Therefore, Low Rolling Resistance tyres can lead to significant fuel savings and reductions in CO₂ emissions. With the cost per kilometre (CPK) translating to a few tankfuls of petrol over the course of a year, savings can offset the higher cost of the tyre over its lifetime.

Lower Fuel Consumption

What if you could improve fuel efficiency?

If you could improve fuel efficiency by 5%...

Annual fuel consumption	×	Improvement in fuel efficiency	=	Reduction in fuel consumption
1,000 litres		5 %		50 litres

Reduction in fuel consumption	×	Cost of fuel	=	Save \$50 per year
50 litres		\$1		

*in USD

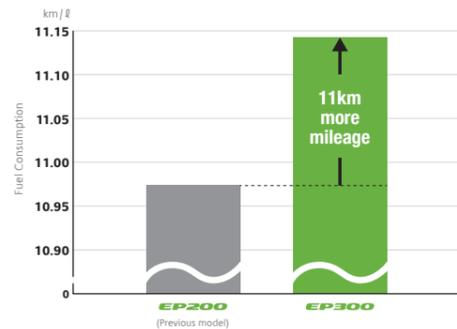

Based on driving 10,000 kilometers per year using 1,000 litres of fuel priced at \$1/litre

When you want it all, the EP300 is engineered for superior performance, which gives you better safety and increased savings.

1 Fuel Efficiency

The low rolling resistance of EP300 proves to increase mileage by 11km per tank.

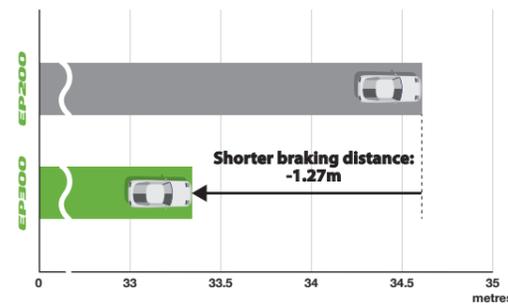

Test conditions: TUV Rheinland Chassis Dynamometer test according to UNECE-R83 and UNECE-R101, Vehicle: Toyota Camry 2.0G, Fuel Tank: 70L, Tyre size: 215/60R16, Inflation pressure: 230kPa, Drive condition: Urban (City)

2 Safer Wet Grip

The EP300 shows improvements in safe wet performance, which is important for drivers in our climate.

Greater peace of mind

Improved grip levels mean a shorter braking distance, even on damp to wet road surfaces.

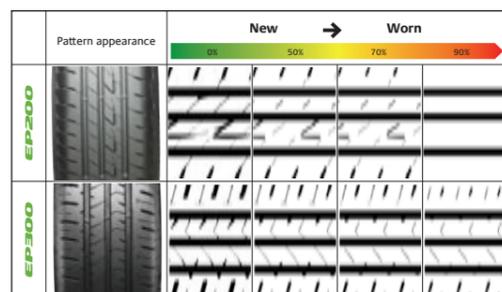

Test conditions: Test course: Bridgestone Thailand Proving Ground, Vehicle: Toyota Camry 2.0G, Tyre size: 215/60R16, Rim: 16 x 6.5J, Air pressure: 230kPa, Speed: 80km/h, Water level: 2mm

3 Long Lasting

Deeper lug depth and optimised crown shape provide long-lasting performance.

Less frequent tyre changes

Save on tyre costs in the long run.

Product Comparison

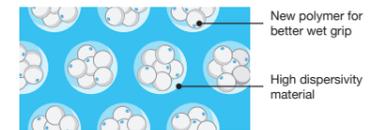

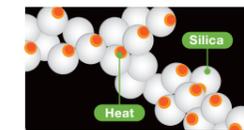

DESIGN & TECHNOLOGY

NanoPro-Tech™

RRC WET

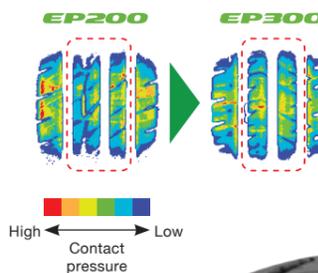

Our cutting-edge compound contributes to improved wet grip and reduced rolling resistance. This is due to its high-dispersing silica that not only increases the contact area, but reduces energy loss.

A Optimised Crown Shape

RRC WET LIFE

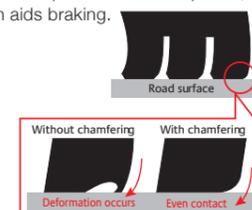

This ensures more even contact pressure between the tyre and road surface, which contributes to better rolling resistance, wet grip and wear life.

B Chamfering Sipe

WET

The rounded block edge design prevents deformation to keep the contact shape flat, which in turn aids braking.

C Round Rib Edge

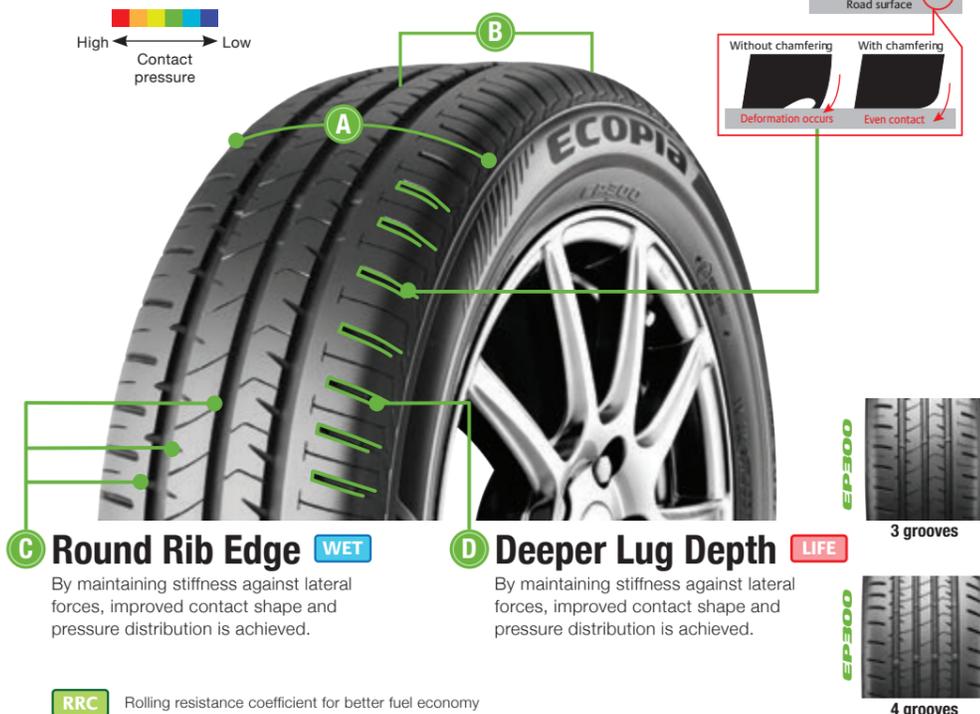

WET

By maintaining stiffness against lateral forces, improved contact shape and pressure distribution is achieved.

D Deeper Lug Depth

LIFE

By maintaining stiffness against lateral forces, improved contact shape and pressure distribution is achieved.

* 4 grooves pattern design

- RRC** Rolling resistance coefficient for better fuel economy
- WET** Improved grip on wet road surfaces
- LIFE** Improved design for longer tyre life

Tread Design For Small Cars

- 1 **Rib-linked Blocks (Outstanding Braking Performance)**
It uniforms ground contact when braking, enhances braking even in wet condition.
- 2 **Optimized 3D Block Shape**
Minimize block surface contact lift off

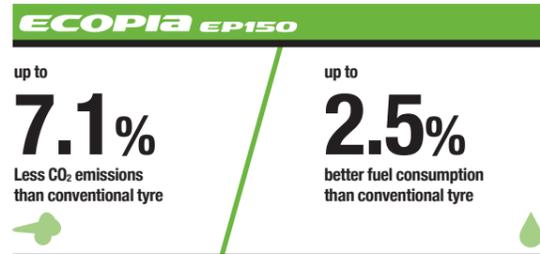

Weight-Optimization (Improved Rolling Resistance)
Optimize the balance of each materials for improved RRC without compromising the durability

Refined Design For SUVs

- 1 **3D Tread Grooves**
Provide a smooth and comfortable ride
- 2 **Rib-linked Blocks**
Ensure uniform weight distribution and Low Rolling Resistance
- 3 **Short and Narrow Slots**
Combination of short and narrow slots that greatly reduces tread pattern noise
- 4 **High-Angle Lug Blocks**
Evenly distribute energy and minimize deformation during braking
- 5 **Optimally Distributed Edges**
Minimize tread wear

ALWAYS RELIABLE

EVERY DRIVE IS A SAFE JOURNEY

Every drive is a safe and reliable journey with TECHNO tyres. The ideal choice for small to mid-sized passenger cars with basic entry level performance and economical value. Now everyone can drive with tyres that deliver reliable quality and good performance on wet conditions.

THE FEATURES BEHIND THE PERFORMANCE

- A Built for value**
 - Block size combination minimizes tyre vibration for better irregular wear resistance to give a decent wear life
- B A Safer Drive Every Day**
 - Chamfered Edge maximises dry, wet handling and braking by improving block uniformity on ground contact that produces greater traction
- C A Safety in Wet Condition**
 - Optimised Sipe Angle and lug effectively prevent tyre deformation and enhances water channeling to resist hydroplaning for your safety on wet roads

BLOCK SIZE COMBINATION

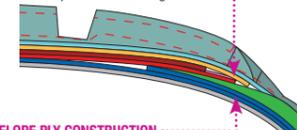

CHAMFERED EDGE

OPTIMISED SIPE ANGLE AND LUG

REINFORCED CAP
Crown protection against penetration damages

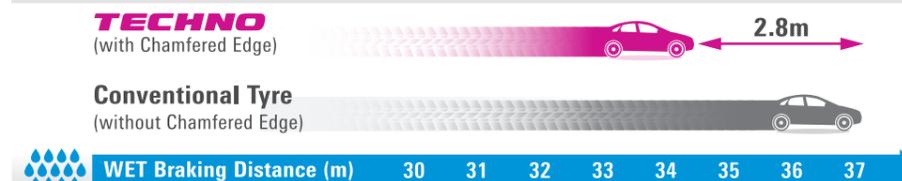

ENVELOPE PLY CONSTRUCTION
Enhanced sidewall cut durability

TECHNO vs CONVENTIONAL TYRE

TECHNO

GEAR UP FOR A STYLISH DRIVE

INCH-UP YOUR RIDE

GEAR UP FOR A STYLISH DRIVE

Stand out from the rest with a stylish lightning groove tread pattern that commands attention whenever you drive, and feel the control your car has over the road. TECHNO Sports, the right choice to inch-up your car.

THE FEATURES BEHIND THE PERFORMANCE

A Stylish looks with peace-of-mind driving
The stylish lightning groove tread pattern adds the unique design your car deserves, setting it apart from the rest. It also enhances water drainage, traction, and handling for city driving.

B Innovative design, quiet drive
TECHNO Sports does not only stand out in style with aggressive features but offers a pleasant drive. The design of 5 separate block pitches arranged in a random sequence around the tyre helps reduce road noise for a quiet ride.

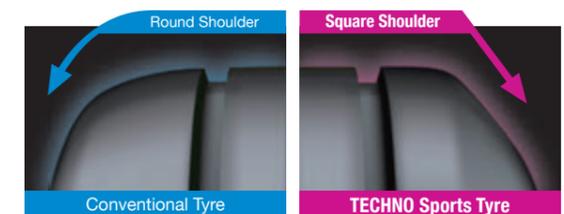

C Bridgestone quality assurance
The Flat Contact Patch design (FCP) helps prevent tyres from deforming due to side-slips to avoid irregular wear, along with enhanced construction to strengthen durability.

C Assured Quality

FCP Tyre Profile
TECHNO Sports is constructed with Flat Contact Patch (FCP) design, which is more squared off at the shoulders to reduce irregular wear by preventing tyre deformation due to side-slips when cornering, offering longer wear life.

Envelope Carcass
The inner envelope carcass is built with strength to maximise tyre durability against external shocks.

B A stylish drive and a pleasant journey

5-Pitch Variable Block
On top of the aggressive look, the inner and outer blocks of the TECHNO Sports tread both use a combination of 5 separate block pitches arranged in a random sequence on tread pattern around the circumference to spread the noise frequency range, minimising road noise for a quiet ride.

A Stand out in style with confident driving

Lightning Groove
The lightning groove pattern has much more than its impressive looks. It helps disperse water away from the tyres and provides increased traction.

— Improved Drainage
— Traction

3D Triangle Block
3D triangular block creates a more constant contact patch, while large size block makes a sharper initial response that contributes to better handling performance.

ALENZA

DESIGNED FOR POWER AND PLEASURE

Two developments key to the Alenza are the 'Nano Pro-Tech' tread compound and the tyre's block structure.

Combining silica and a polymer at a nanotechnology scale to control the property's of the tyre's rubber structure, the Nano Pro-Tech innovation improves wet-weather grip and resists wear.

Additionally a 'multi-round' array, chamfering, M-shaped sipes, and the tyre's block structure bring with it gains in braking performance and steering response.

DYNAMISM AND LUXURY FOR SUV

PROVIDING A QUIETER AND MORE COMFORTABLE RIDE

Combining the allure of rugged yet sleek good looks, a commanding driving position and the practicality of a Sport Utility Vehicle (SUV) is hard to ignore. Complementing an SUV's ability to perform as specified, and realising that potential depends on the tyres it wears on its wheels. As the main contact point between all four wheels and tarmac, an SUV's tyres determine how well the car grips the ground, maintains control under braking, delivers comfort on the drive and whether it has the durability to keep on performing as intended kilometre after kilometre.

Dynamism and Luxury for SUV.
Designed for power and pleasure.

Designed for luxury SUVs, Bridgestone Alenza 001 is exclusively engineered to maximise the potential on both wet and dry roads in confidence and comfort. Offering high-level braking performance, outstanding tyre life, and enhanced grip on wet and dry roads.

Nano Pro-Tech™

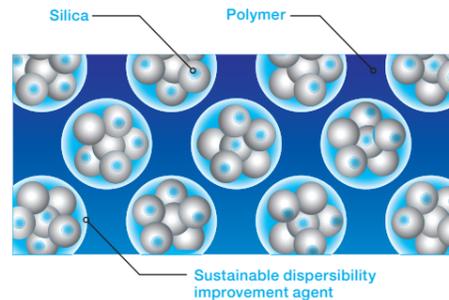

Nano Pro-Tech™

A nanotechnology developed to maximally enhance the performance of a tyre by freely controlling the rubber structure at the scale of a millionth of a millimeter to suit the required performance including fuel efficiency, safety, silence, and endurance.

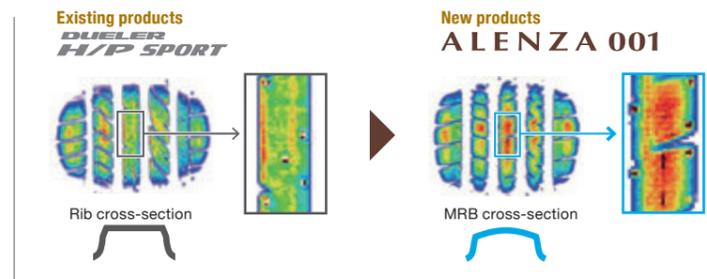

Silica

Silica bonds with polymer to provide flexible characteristics in wet and low-temperature conditions. It is possible to realize both heat resistance and abrasion resistance as well as improved grip in a wide range mainly in wet and low-temperature conditions but also in high-temperature conditions.

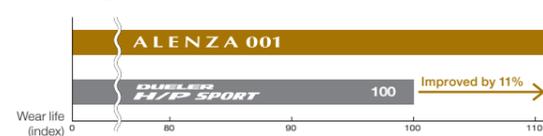

A 3MRB (multi-round block)

Wet grip has been improved by optimizing the roundness at the edge of the rib end and raising the contact pressure at the rib center.

Improved wear life

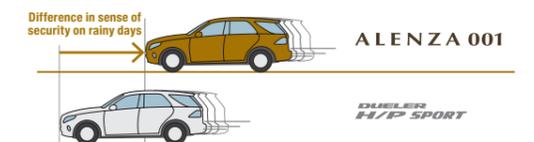

TEST CONDITIONS

Tire size: 255/50R19

Car model used for test:
Toyota Lexus RX450
DAA-CYL 10W (3450 cc),
Front-wheel drive

Air pressure: 230 kPa
Test distance: 10,000 km
Tire rotation: None

Improved wet performance

TEST CONDITIONS

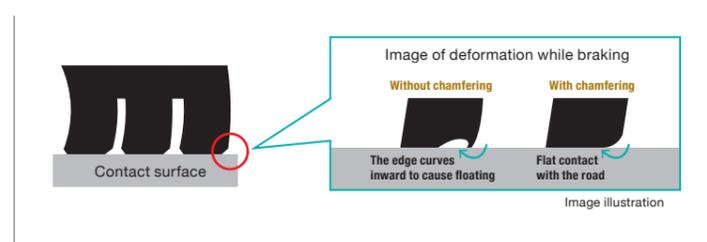

Tire size: 255/50R19

Car model used for test:
Mercedes-Benz ML350 (4MATIC)
Initial speed: 80 km/h

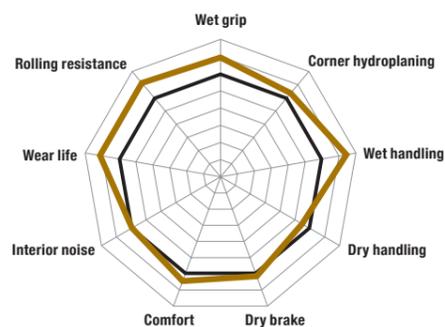

Surface type: Asphalt
Water depth: 2mm
Test location: BSPG

B CHAMFERING

Deformation of the edge curving inwards while braking is restrained by rounding the corner of the block end section. Realizing flat contact with the road while braking.

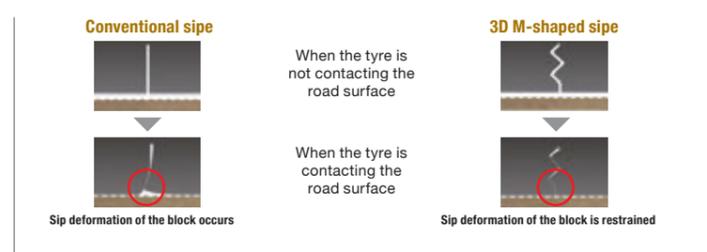

Comparison in performance between ALENZA 001 and DUELER H/P SPORT

C 3D M-shaped sipe

3D M-shaped sipe is made midway through the cross-section. Sipe deformation of the block while braking is restrained to prevent reduction of contact area to improve wet grip.

ALL-TERRAIN TRACTION

DUELER TYRES DELIVER A QUIET RIDE AND VERSATILE PERFORMANCE ON BOTH WET AND DRY SURFACES.

DUELER combines the high-level traction and toughness that is required for full-fledged 4WD vehicles. At the same time, it provides superior driving performance, comfort, and reliability to a wide variety of vehicles including pickups, SUVs (sport utility vehicles), CUVs (cross utility vehicles), and premium SUVs / CUVs.

The essence of Bridgestone's tyre design technology which receives worldwide recognition has been channelled into the DUELER tyre brand. It provides even greater driving pleasure for various high-performance 4WD vehicles.

WET PERFORMANCE

Even in the rain, reliable water evacuating sipes and grooves efficiently channel water away from under the tyre, ensuring solid grip and improved safety.

NOISE / VIBRATION REDUCTION

Optimized tread blocks minimize road noise and vibrations from various road and weather conditions for a smooth and comfortable ride.

TRACTION AND CONTROL

Innovative tread pattern design delivers among the highest performance and response possible, providing a confident ride on many types of terrain.

GO ANYWHERE!

What's power without traction? The world's toughest vehicles can climb difficult terrains, only because they ride on the invincible DUELER series from Bridgestone. Designed to bring out the power packed into the world's leading sports utility vehicles and cross utility vehicles, DUELER imposes an iron grip on any kind of terrain, from slick city roads to daunting mountain trails.

Type of Road Conditions:			
			
Designed to give drivers the riding comfort and performance driving characteristics on luxury SUVs.	Eco-friendly tyre with best ride comfort and low noise performance.	Premium quality all-terrain tyre exclusively engineered for sheer comfort and performance, from dry roads to off-roads.	Exceptional quality 4x4 tyres especially built for off-road use, with bold looks and aggressive performance.
Main Features:			
<ul style="list-style-type: none"> • Superb riding comfort and excellent steering performance • Superior safety in both wet and dry conditions • Engineered to provide long wear life 	<ul style="list-style-type: none"> • Advanced low rolling resistance • No compromise to safety or wear life • Better ride comfort and less noise 	<ul style="list-style-type: none"> • Excellent traction and steering control • Enhanced off-road stability • Smooth ride and low road noise 	<ul style="list-style-type: none"> • Advanced mud traction and grip • Enhanced performance and increased durability • Tough aggressive design

The ultimate 4WD all terrain tyre, designed and tested to withstand the harshest conditions.

Its proven superior wear life and better resistance to cutting and chipping make it the number one choice for all terrain adventuring. Dueler is tough enough to bring you back.

EXCELLENT TRACTION & STEERING CONTROL

Designed to give superior road-handling performance whatever the terrain.

ENHANCED OFF-ROAD STABILITY

Good traction and stability on a variety of terrain.

SMOOTH RIDE & LOW ROAD NOISE

Optimised tread design dampens road noise and vibrations to deliver a smooth quiet ride.

KEY DESIGN ELEMENTS

- 1 Reinforced sidewall produces efficient stress distribution and resistance against abrasions and punctures
- 2 Bold and aggressive white lettering, with black lettering on opposite side to match
- 3 2 in 1 combination design seamlessly merges tread with shoulder
- 4 Computer optimised block pattern merges ultra-modern design with high-performance superiority
- 5 Advanced continuous streamlined grooves efficiently channel water outward while providing greater traction and control under wet conditions
- 6 Optimised highs and lows in the shoulder lug innovatively reduces noise and tread wear
- 7 Tough, alternating Semi Stealth grooves provide high stiffness

ENGINEERED WITH REVOLUTIONARY 3D TECHNOLOGY FOR ADVANCED OFF-ROAD PERFORMANCE

The DUELER M/T 674 tyre has been designed to meet the hardcore demands of off-road driving even through heavy mud. Incorporating revolutionary 3D technology to offer superior durability and off-road performance, the DUELER M/T 674 tyre provides maximum traction and advanced control, no matter how severe your driving needs.

MADE FOR MUD

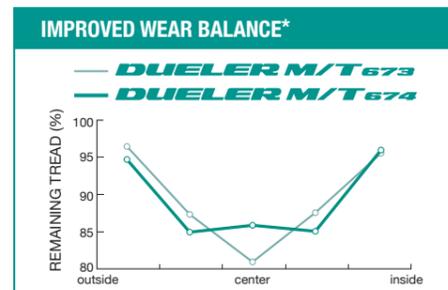

Dynamic 3D Grooves deliver superior traction by cutting into mud and then releasing it as you go. 3D Shoulder Lugs provide added traction for outstanding off-road performance.

READY FOR ANYTHING

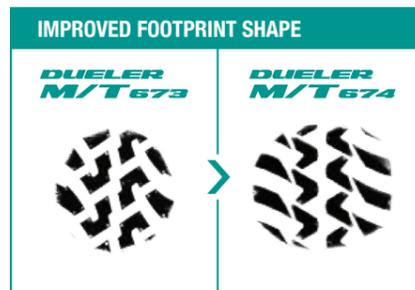

With a molded 3D Upper Sidewall providing enhanced mud traction and a tread pattern as bold as it is intelligent, the DUELER M/T 674 is ready when you are.

TOUGH TECHNOLOGY, LASTING PERFORMANCE

New tread design and 3D technology reduce center wear for excellent durability, while the M/T compound protects against cut chips. Since wear balance has been improved, tyres last longer.

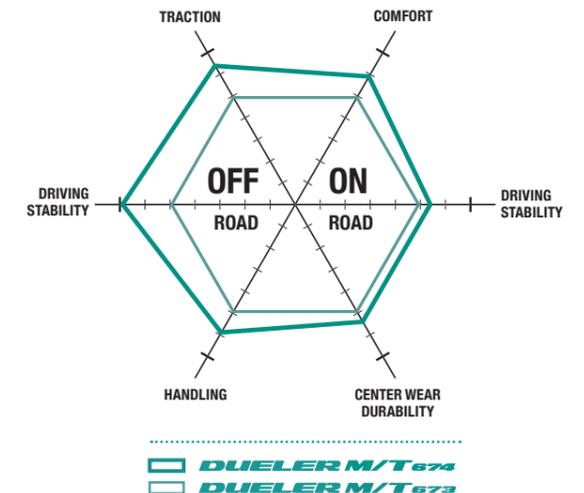

*Wear balance test conducted outside Jakarta, Indonesia with a Mitsubishi L200 Strada on LVR 265/75R16 112Q tyres for a total distance of 10,000km

KEY DESIGN ELEMENTS

- 1 Innovative 3D Buttress step-and-slope design delivers sure control in mud
- 2 Aggressive 3D Upper Sidewall offers added mud traction and protection from off-road hazards
- 3 Raised bold white lettering adds steel to the tyre's striking design
- 4 3D Shoulder Lugs for increased durability and superior handling
- 5 3D Grooves cut into mud for advanced traction and improved performance
- 6 Specially designed voids slope downwards from the center to self-clean for enhanced traction

OWT: Outlined White Lettering on Side Wall
RBT: Raised Black Lettering on Side Wall

RUN-FLAT PERFORMANCE

Even when a tyre suddenly loses air, the car can be safely driven without losing control.

Mechanism of Side-wall reinforced rubber used in Run Flat Technology tyres (Even with a loss of air pressure, load is supported by the side-wall reinforced rubber)

Heat Control Technology

Drive in comfort even with tyre air loss

When tyres puncture, the sidewalls can suddenly warp and generate greater heat. The biggest challenge to maintaining or increasing Run Flat Technology tyre durability (after air pressure is lost) and enhancing riding comfort, is coping with heat generation. Bridgestone's heat control technology resolves this problem.

MORE COMFORTABLE RIDE

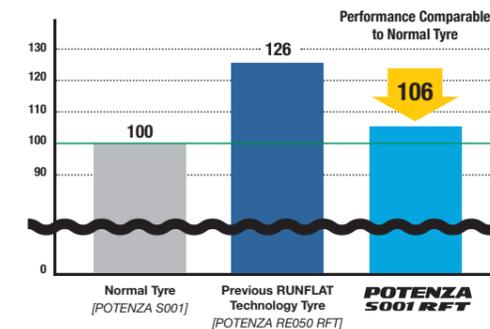

Performance in riding comfort comparable to normal tyre could be achieved.

[Test Conditions]
 Normal tyre (POTENZA S001): 245/40R18 97Y XL
 Previous Runflat Technology tyre (POTENZA RE050 RFT): 245/40RF18 93W
 POTENZA S001 RFT: 245/40RF18 93W
 Test load: 4.71kN Air pressure: 240kPa Testing method: Static load characteristics testing
 Testsite: Facilities located at Bridgestone Technical Center

RUN FLAT TECHNOLOGY TYRE

LAUNCHING THE NEXT GENERATION RUN FLAT TECHNOLOGY TYRE THAT KEEPS YOU SAFE ALL THE TIME

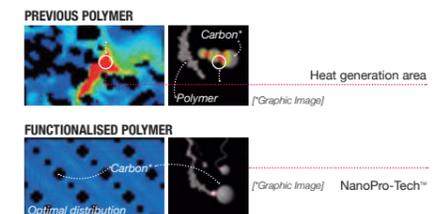

Bridgestone recognises the importance of helping to raise the level of safety for motorists around the world and so has pursued ways to overcome the risks associated with punctures. These efforts have resulted in the revolutionary tyre technology known as Run Flat Technology (RFT). RFT tyres are specially constructed so that even without air, it can still maintain its shape and also the strength to support the weight of the vehicle, therefore continuing to work safely.

New Sidewall-Reinforced Rubber

Reduces friction occurring between carbon molecules when the tyre is loaded, thereby reducing heat generation.

Compared with sidewall-reinforced rubber of previous Run Flat Technology tyres, NanoPro-Tech™ can reduce heat generation that occurs due to the deformation of tyre sidewalls during run-flat driving (when driving on tyres that have lost air pressure) by 50%.

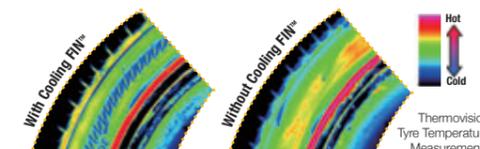

COOLING FIN™

Cooling sidewall heat generated when driving on tyres that have lost air pressure.

COOLING FIN™ technology features protrusions, which face toward the center of the wheel on the surface of tyre sidewalls in order to create disturbances in the airflow and thereby cooling the tyre.

[Test conditions]: Tyre size: 225/45R 17 | Test air pressure: 0kPa | Test load: 3.92kN
 Width of rim: 7.5 inches | Test speed: 80km/h | Testing method: surface temperature taken by indoor drum testing device after 30 minute rotation the tyre was imaged.

STABILITY & PRECISION THROUGH ENHANCED DESIGN

POTENZA S001 RFT tyres feature an asymmetric design combining a large outboard shoulder, interlocking tread blocks and a central circumferential rib to enhance dry road steering response, high-speed stability and cornering precision.

Dry & Wet Performance

Similar to POTENZA S001 (normal tyre), POTENZA S001 RFT provides excellent dry & wet performance by an inner pattern with high wet performance and an outer pattern with high dry performance.

RUN FLAT EVOLUTION

FOR A SAFER & ENVIRONMENT-FRIENDLY CAR SOCIETY

Bridgestone Run Flat Technology Tyres initially began as a social activity to enable vehicles for the physically disabled to be driven even after a loss of air pressure. Bridgestone aims for a safer and environment-friendly car society. With this goal in mind, Bridgestone will continue to improve its Run Flat Technology Tyres.

Semi-Slick Center Rib

The slick center rib enhances handling response of the center steering area.

60° Slant Sag

Stereoscopic blocks in the F1 nose are distributed at 60°. Block rigidity is optimised, and both traction and brake performance were established.

Combination of Block & Slick

Traction and brake performance are enhanced by grooves etched in a cross direction pattern. Furthermore, by adding slick regions, partial wear which tend to occur on inner sides is inhibited, thereby suppressing difference in wear between the inner and outer sides.

GUTT II Simulation / Straight Grooves

To further enhance dry performance, three main grooves are included to create large blocks on the outer sides. Distribution, width, and shape of straight grooves are determined by simulation to ensure high hydroplaning performance.

Multi-Performance Block

Large blocks are created on the outer sides, which experience load during cornering, in order to increase rigidity. This improves handling under both dry and wet conditions.

For Wet Performance

Straight grooves are set in the inner side to ensure good drainage, promoting wet performance such as anti-hydroplaning.

For Dry Performance

Block rigidity is ensured by distributing large blocks, promoting dry performance such as improved dry handling.

***Note:** Always install the Tyre Pressure Monitoring System (TPMS) when mounting POTENZA S001 RFT. Use only Bridgestone's recommended wheels. All are tubeless types. POTENZA S001 RFT has left-right asymmetry, so there are no specifications for rotation direction. Follow the "INSIDE" and "OUTSIDE" marks when mounting. Rather than size, there are differences in side design and specifications. Tyre width shows the cross-section width. The rim guard, tyre side pattern, writing, etc., are not included in the tyre width.

BATTLE-TESTED PERFORMANCE & CONTROL

Drivers battling to win in the world's most gruelling races count on nothing else but POTENZA. That is why it is never just another tyre. It is the co-pilot to world champions.

Bridgestone's ultimate 'track day' tyre with dependable everyday performance on the street.

Wet Performance

- Wide Circumferential Grooves
- Angled Directional Pattern

Hydro Evacuation Surface

- provide effective drainage in wet conditions

Track Performance

Wide Center Rib

- Promotes agile steering response

Extreme Shoulder Block

- Allows for confident cornering

Unique Construction and Compound

- Tuned for maximum handling

Performance at high speed for the circuit. Superb dry grip performance and cornering means superb control even when pushed to the limit!

Seamless Stealth Pattern Design

Ensure the compatibility with dry grip and drainage performance by embracing "seamless stealth pattern design".

Spiral Belt Construction

Achieved high handling and easy-to-use by embracing "spiral belt construction" which is designed exclusively for RE-11S.

Improved Groove Area Stability

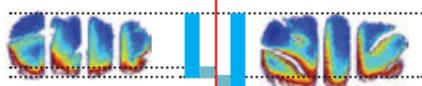

It also improves stability of groove area by embracing top gum which is well-established with particulate carbon and special polymer for motorsports.

STEERING PUTS THE DRIVER AT ONE WITH THE ROAD

IMPROVED GRIP IN CONTACT PATCH

- Stick (Grip) Area Increased
- Slide (Grip-loss) Area Reduced

NEW TREAD COMPOUND – GRIPS THE ROAD

A new high-grip polymer + Optimised reinforcing agent = Better grip on the road

A large orange commercial truck is shown from a low-angle, side-rear perspective, driving on a road. The truck is moving towards the right, and the background is a bright, hazy sunset or sunrise sky. The truck's body is highly reflective, showing the sky and the road. The wheels are blurred, suggesting motion. The overall mood is one of reliability and long-distance travel.

COMMERCIAL VEHICLES

THE LONGER ROAD TRAVELLED HAS NEVER FELT SAFER

Whether it is cargo or passengers you are carrying, one thing is for sure: you need to get them there safely and smoothly. And every time you do, we have one more reason to be proud of what we do. Our constant innovations ensure that our tyres stand up to the harsh demands of heavy commercial loads, yet are durable enough to keep your costs to the very lowest. So that you, your customers and ourselves are all winners at the end of the day.

Smile, with Bridgestone!

**EVERY TRIP YOU COMPLETE,
PUTS A SMILE ON OUR FACES.**

LIGHT TRUCKS & VANS

HIGHER LEVEL OF DURABILITY & LONGER WEAR LIFE

BRIDGESTONE, BUSINESS THAT GOES THE EXTRA MILE

When it comes to light trucks, commercial vans and utility trucks, Bridgestone has you covered. Whether you use your vehicle on or off road, on the highway or commercially, we have a tyre to suit your needs. Some people will want increased tyre lifespan while others will want superior traction and manoeuvrability. Some people simply want the reliability of an all purpose tyre. Whatever your needs, from light commercial vehicles to vans and utility trucks, our L/T range has a tyre for you.

Thankfully, Bridgestone Means Business!

Because business is demanding, I expect my set of tyres to take me where I want to go, when I need to. To me, every minute counts, and getting there on the dot each time means I earn more trust, and more respect. My best partner on the road - Bridgestone. Because just like me, these are tyres that go the extra mile, every time. I am driven to greater success, because I can count on my most valuable assets to carry me all the way there!

DURAVIS R624

Get more out of your tyres and your business with Bridgestone's DURAVIS range of van tyres. Our focus on safety, durability and fuel economy help minimise the total cost of ownership and maximise your return on investment.

Embedded Technologies & Product Features

Aggressive Pattern & Wide Tread

Long tyre life comes true through increased contact width and maximized block stiffness. Irregular wear control through optimum lug and sipe arrangement.

Duravis Case

DURAVIS case mounted for maintaining long life and durability.

Flask Sipe

Maintains shoulder block sipe until the end period of use and controls performance deterioration after wear.

R202 On Road

► All Position

The Bridgestone V-Steel Rib R202 is an all position rib tyre designed for light trucks and mini buses. It features a V-steel rib for heavy-duty performance and reduced irregular wear and punctures. Also offering greater manoeuvrability, it's ideal for city and highway driving.

- Excellent responsive handling
- Good wear resistance and long wear life
- Low road noise
- Dependable performance

R230 On Road

► All Position

The Bridgestone R230 is an all position radial tyre for light trucks travelling on the highway and at high speeds. It features a V-steel rib for heavy-duty performance and reduced irregular wear and punctures, plus a carbon compound for improved grip and longer life.

- Excellent responsive handling
- Outstanding grip in the wet and dry
- Reduced risk of hydroplaning
- Superior cornering stability
- Good wear resistance and long wear life
- Quiet, comfortable ride
- Dependable performance

TOTAL SOLUTION TO REDUCE YOUR OPERATING COSTS

Bridgestone's B Solution is a one-stop tyre service for truck and bus owners and operators. From buying, maintenance, roadside service, recycling to retreading of tyres, B Solution is there to help reduce operating costs as well as downtime.

FULL SUPPORT / PACKAGES

- Extensive Bridgestone Professional Service Network
- Trained technicians at authorised Bridgestone TB dealers.
- IT support for your total tyre management

SERVICE MAINTENANCE

Maximise Bridgestone's new tyre life with services

Maximise retread tyre life with services

Lower CPK
Cost per Kilometre

Increase tyre life cycle

BRIDGESTONE NEW TYRES

BANDAG RETRAD

BRIDGESTONE NEW TYRES

- Leading brand for truck & tyres
- Excellent performance & durability
- Higher casing value & better retreadability

BANDAG RETRAD

- World-renowned retreading methods
- Reliable retreaded tyres for safety and excellent mileage.

TRUCKS & BUSES

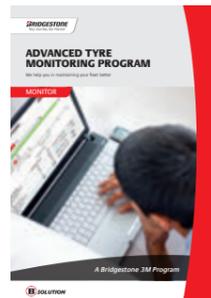

3M Programs

As part of Bridgestone Solution Business to meet the different concerns and needs of fleet operators, we have come up with 3 service programs to provide easy solutions/services to assist them in improving their tyre maintenance, optimizing their operations and potentially reducing costs.

MONITOR

The Monitor Program is for fleets with their own tyre service team, but require technical support to improve their efficiency. Bridgestone will act as consultants performing inspections and providing a set of tyre maintenance reports periodically to the fleet.

SERVICE OFFERED

- On Vehicle Tyre Inspection
- Reports on Tyre Maintenance and Performance
- Scrap Survey

MAINTAIN

The Maintain Program is for fleet customers who want to outsource their tyre maintenance. Bridgestone will provide all tyre servicing works such as mounting, repair, rotation, etc. performed on site or at the tyre shop and also periodic reports on tyre performance.

SERVICE OFFERED

- Tyre Maintenance Services
- On Tyre Inspection
- Scrap Survey
- Reports on Tyre Performance, Maintenance and Tyre Life

MANAGE

The Manage Program is designed for data driven fleet customers who are looking to outsource but want to retain complete visibility over their tyre assets and their performance. Bridgestone provides a comprehensive proprietary online system which gives high level reporting and visualization so they can stay up to date anytime anywhere.

SERVICE OFFERED

- Total Tyre Management
- Exclusive access to the online portal to monitor all tyre-related KPIs

PUSHING OURSELVES, DRIVING INNOVATIONS

- First in the Market
- On-the-Spot Report
- Comprehensive Data Collecting Tool

- With immediate data input during Tyre Check Inspections, issues can be communicated to customers **immediately** in a **clear and informative manner**.
- **Photos** can be taken to make it **easier to judge** the true condition of a damaged tire and to take the appropriate actions.
- Past inspections history can be accessed to **monitor progress** and issues.

AND MUCH MORE!

At Bridgestone, we constantly push ourselves to innovate and deliver the best products and services. Designed for Windows 8 tablet, the newly developed Toolbox Touch App is a testament to that promise.

Please consult your Bridgestone representative for more information on the programs to start promoting to your fleet customers.

OPTIMIZED CAP/BASE TREAD

Advantages:
Provide **resistance to wear**, cut and chip.
Low heat generation from rubber compound in base tread.

Benefits:
Enhance and **maximize the retreadability** rate.
Improve wear life.

OPTIMIZED RIB DISTRIBUTION

Advantages:
Rib widths are optimized to **reduce deformation and even out contact pressure**.

Benefits:
Reduces **irregular wear** (rib punch wear).

COMPUTER DESIGNED ALL STEEL CASING

Advantages:
4 steel belts ensure tread area **remains flat** during road contact.
Steel body ply sustains the inflation for heavy load.

Benefits:
Boost **durability** and **maximize the retreadability** rate.

OUTSTANDING TRACTION : The R192's Variable Depth Sipes maximize sipe density for improved braking and acceleration, even on wet roads. The solid rib design delivers excellent levels of handling performance.

ENHANCED DURABILITY : The R192's robust casing and reinforced side guard offer excellent protection from scuffing, abrasion and general wear resulting in excellent retreadability.

KEY FEATURES

- STONE EJECTORS**

Advantages: Dispel stones that could be trapped in the ribs.

Benefits: Reduction in the occurrence of stone drilling. Improves casing durability.
- GROOVE FENCE**

Advantages: Gates that 'trap' road noise and lessen tire noise by around 1 to 2db depending on tread pattern.

Benefits: Enjoy a quieter ride and reduced environment noise while on the road.
- OPTIMIZED RIB DISTRIBUTION**

Advantages: Rib widths are optimized to reduce deformation and even out contact pressure.

Benefits: Reduces Irregular Wear and improves Retreadability.
- SQUARE SHOULDER DESIGN**

Advantages: Contact pressure is more evenly distributed.

Benefits: Reduces Irregular Wear
- DUAL NYLON CHAFERS**

Advantages: Protect the highly stressed body ply turn up, and spread the stresses over a larger area to reduce cracking.

Benefits: Boost longevity and enhance and maximize the retreadability rate

TECHNICAL FEATURES

- Superior wear life performance
 - (A) - Wider tread width + deep grooves.
- Superior traction & brake performance
 - (B) - Aggressive block pattern & adjusted pitches of blocks.
- Optimized irregular wear resistance
 - (C) - Optimized shape of tie-bars.
- Optimized block tear resistance
 - (D) - Optimized block shapes (Diamond cut).

TRUCKS & BUSES

Retread

SAVE. SAFE. SAVE

BRIDGESTONE BANDAG IS ALL ABOUT SAVING AND SAFETY

Retreading tyres offer drivers the best way to save, yet still stay safe. Committed to bringing all the benefits of this technology to our customers, Bridgestone has acquired the industry leader Bandag inc in May 2007. Taking on the name of Bridgestone Bandag (BSBD), this new company has quickly moved to promote the idea of retreading to customers worldwide.

Tyre Retreading Process

1 STEP
Inspection process after tyre received

2 STEP
NDT (non-destructive testing) inspection process

3 STEP
Laser inspection process

4 STEP
The buffing process

5 STEP
The repair process

6 STEP
Application of cushion gum

7 STEP
Precured tread application process

8 STEP
The envelop process

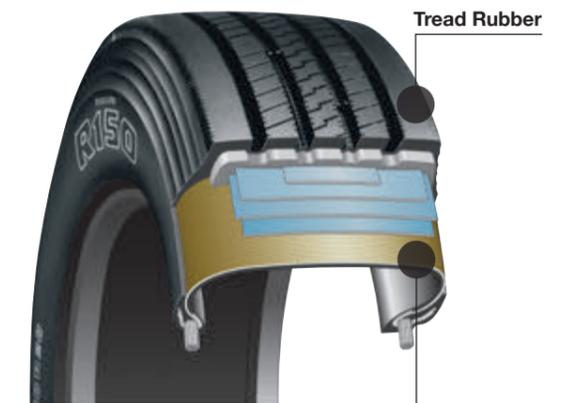

9 STEP
Curing process

10 STEP
Final inspection

WHAT IS A RETREAD TYRE?

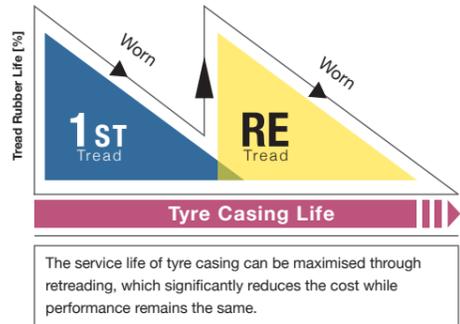

When a tyre has exhausted its intended service life, the worn tread surface is removed and a fresh new tread is attached. This enables the tyre to be reused instead of being scrapped, thus extending its usable life.

Even after the tread is worn, the tyre casing is still in good useable condition with proper tyre maintenance during its first service life.

TRUCKS & BUSES

Retread

LOWER COSTS

Even when the main treads have worn out, tyre casings are usually still in good condition and can continue to be used if retreaded. This stretches your investment dollar and cuts your operating costs without affecting performance or safety.

GREATER SAFETY

Nothing matters to us as much as your safety, which is why out of the 10 steps necessary in the retread process, four steps are all focused on inspecting the used tyre to ensure it is right for retreading. The process itself ends in a stringent final inspection, but our commitment does not end there. Customers enjoy regular after-sales safety inspection, maintenance and even consultancy.

INSPECTING USED TYRE TO ENSURE SUITABILITY FOR RETREADING

- 

Inspection Process After Tyre Received
First the entire tyre casing is checked visually and by touch. Any visible defects are marked.
- 

NDT (Non-Destructive Testing) Inspection Process
The NDT process is used to inspect the internal parts of the tyre. Any nail holes or punctures in the tyre casing are marked for repair.
- 

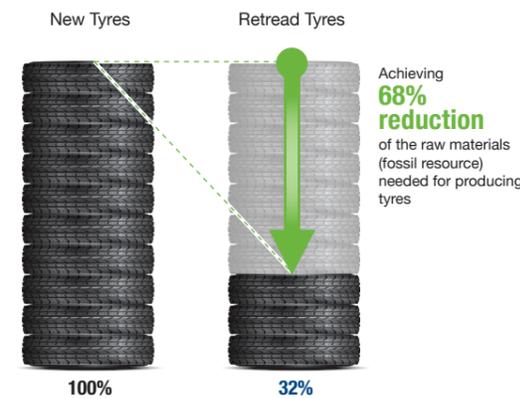

Laser Inspection Process
The tyre is placed in a machine in which a vacuum has been created. The tyre is exposed to a laser beam to check for internal defects. Any abnormalities found are shown on a display screen.

After the first three tests have been completed, a trained inspector decides whether or not to go ahead with retreading. The decision is based on the tyre's condition and Bandag specifications.
- 

Final Inspection
Each cured tyre is thoroughly inspected to verify that there are no problems.

MORE ECO-FRIENDLY

Retread tyres require only 32% of the petroleum needed to make new tyres, and less than 1/2 of the rubber. By greatly reducing CO₂ emission and industrial waste generated in the production process, Bridgestone Bandag is actively contributing to a cleaner environment.

REDUCTION OF CO₂ EMISSION LEVELS DURING PRODUCTION AND UPON DISPOSAL

	1st Tyre	2nd Tyre	CO ₂ Emission
1	New tyre → Scrap	New tyre → Scrap	New Tyre 2 times CO ₂ + Scrap Tyre 2 times CO ₂
2	New tyre → Recycle Tyre Casing	Retread Tyre → Scrap	New Tyre 1 time + Retread + Scrap Tyre 1 time CO ₂
1 - 2 =			165kg - CO ₂

“ Our American Customers’ Voice:
Bandag WORKS! ”

Mr Gary Van Blaricom, Eastern Iowa Tires, Inc
“Bandag’s appeal is offering generous support.”

The friendly support services of Bandag in management, technology and sales have helped us immensely. In particular, their help desk’s response to our problems has been splendid. They have always delivered prompt assistance that helped us resolve urgent problems.

Mr Michael Gerdin, Heartland Express, Inc.
“Nothing is more important to us than the quality of our tyres.”

Quality is our most important consideration when it comes to new tyres or retreads, and we only use the products of companies we trust...We send out about 400 to 500 tyres a week to Bandag dealers to get them retreaded and delivered back to us. They always deliver high-quality products to us right on schedule. We have great faith in them.

Mr Murray Fitzer, Florilli Transportation
“The Bandag dealer network throughout America keeps us going.”

Cost is our most important consideration when we buy tyres...That is why we only buy Bridgestone tyres. Their casings are always high performance. We normally retread tyres... We always use Bandag dealerships because of their reliable products and the ample knowledge of their sales personnel.

TRUCKS & BUSES

Retread

3mm TREAD DEPTH

What's so Important about 3mm Tread Depth?

Tyres with at least 3mm of tread depth might still be used for a short period before they are totally worn out. But if we remove tyres with at least 3mm tread depth and send them for retreading, they might be able to offer more mileage and provide better CPK (Cost Per Kilometre). So it's better to retread a tyre when it has at least 3mm tread left, than to use it until it is totally worn out.

3mm tread left

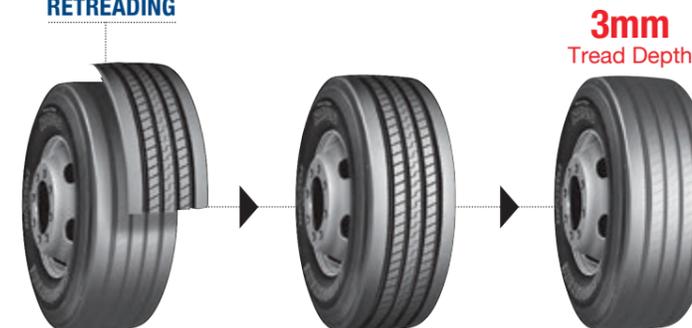

3mm

New Tyre

Tyre needs to be maintained during first life in order to ensure good retreadability.

RETREADING

1ST RETREAD LIFE

Additional **58,800km** mileage. Sent for 2nd retreading with 3mm tread depth

3x TYRE LIFE!

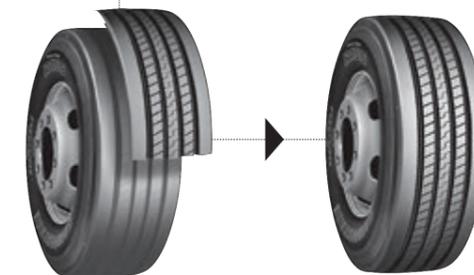

What is 3x Tyre Life?

If you remove a tyre with at least 3mm tread depth and send them for retreading, you can achieve up to 3 TIMES the life*. The casings of these tyres will not be damaged due to exposure of steel belt for Truck/Bus Radial Tyres, reducing the possibility of rust and dirt which may cause belt separation in radial tyres.

* Above mileage data is for illustration purpose and is based on OTD=17mm for new and retread tyre. Actual mileage may differ depending on applications & mounting positions.

Assuming retread wear = 4,200km/mm

RETREADING

2ND RETREAD LIFE

Another **71,400km⁺** mileage.

*Casing retreadability depends on how well maintained the tyre is during operating conditions, such as proper inflation pressure, regular tyre checks, etc.

+ Assuming Total Wear Out is 17mm.

EASY TO WORK HARD

**IF ONLY
EVERYONE,
OR EVERYTHING
WORKED
THIS HARD**

Ever wished you had a worker who could work day or night, in rain or shine, and never complained? Stop and take a look under your vehicles. For decades, Bridgestone has been the closest partner to the industrial segment, bearing the weight of the endless parade of trucks, trailers, forklifts, construction and mining machineries that roll on to build a better, stronger world. Hard work? Not at all!

JL

J-LUG / J-LUG 2

- Designed for forklifts, trucks, shovel loaders and tractors

PASSENGER VEHICLE TYRE CARE + GUIDE

KNOW YOUR TYRES

A car simply is not going to go anywhere without tyres, yet tyres are often the most neglected parts of a car. Choosing a good tyre, and keeping it in good shape is critical to your safety on the road. You will be helping yourself in a big way by taking a little time to understand tyres, and how to keep them in good working order.

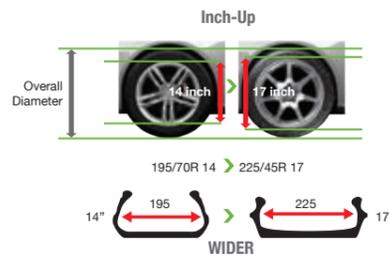

Upsizing Your Tyres

Wider tyres not only make for better performance, but provide a more sporty look. But before you go ahead and upsize, take note of some important pointers. The replacement tyre you choose must keep the overall diameter, and exhibit the same or higher Speed Symbol (SS) / Load Index (LI) of the original tyre as far as possible.

An allowance of + or - 3% of the original is considered acceptable. This is to ensure your speedometer remains accurate, and to prevent the damage that can be inflicted on an oversized tyre when it rubs against the wheel arch as your car turns.

Upsizing In 3 Easy Steps:

1. Maintain overall diameter (+/- 3%).
2. Keep to the same, or choose a higher LI and SS.
3. Check for wheel arch clearance.

How to Read Tyre Markings

Understanding universal tyre markings can help you to know a tyre better and also to choose a suitable one when the need arises*:

1. **255**: Width in mm of the tyre from sidewall to sidewall.
2. **45**: Aspect ratio or Series. Indicates the height of tyre sidewall measured as a percentage of its width. 45 or simply 45 Series would be 45% of 255mm (+114.75mm).
3. **R**: Radial construction, the most common among passenger car tyres today.
4. **18**: Diameter in inches of the rim that the tyre is designed to fit on.
5. **103**: Load Index (LI) indicating the maximum load the tyre is designed to withstand. A 103 LI indicates a maximum load of 875kg.
6. **W**: Speed Symbol (SS). All tyres have this speed rating letter including maximum speed the tyre can sustain without losing control or bursting. "W" is common, with "V" and "Z" indicating high speed performance.

Functions Of A Tyre

Tyres serve four important functions:

1. Support vehicle weight
2. Absorb road shocks
3. Change and maintain direction of travel
4. Transfer traction and braking forces to the road surface

Note: A tyre with "XL" marking indicates Extra Load that allows a higher inflation pressure than a standard load tyre which increases the maximum load. *Please refer to the Load Index and Speed Symbol charts.

KEEP THAT TYRE ROLLING

Considering how important tyres are for a smooth and safe drive, it is surprising just how quick and it is easy to care for your tyres. By following our tyre care tips, and conducting simple regular checks, you will not just save time and money, but more importantly, stay safe on the road.

Safety

Tyres that are not correctly inflated and/or worn out will affect the braking distance of a vehicle.

Comfort

Over-inflated tyres causes bumpy rides, while under-inflated tyres make the ride too soft and steering heavy.

Economy

Incorrect inflation can affect fuel consumption and stress the steering system.

Handling

Incorrectly-inflated tyres or uneven tyre pressures can seriously affect handling, making it difficult or even impossible to drive in a straight line or steer around corners.

TYRE CARE MADE SIMPLE

DO A DAILY VISUAL CHECK

1. Check that all tyres have about the same inflation pressure.
2. Check the sidewalls for cracks or unusual bulges.
3. Check for and remove any foreign objects (e.g. stones or nails) that could puncture your tyre.

DO A MONTHLY TYRE PRESSURE CHECK

1. Use a proper tyre gauge to measure tyre pressure.
2. Check pressure and inflate only when the tyres are cold (a hot tyre will show inaccurate reading due to inflation).
3. It takes as long as 4 hours for a tyre to cool down so it's best to check tyre pressure first thing in the morning.
4. Your vehicle tyre pressure chart can usually be found on the driver's door frame.
5. Don't forget to also inflate your spare tyre.

CHECK FOR IRREGULAR WEAR

This is when one section of the tyre is more worn than the rest and occurs when:

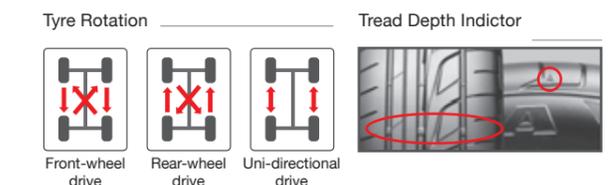

1. Tyres are not uniformly inflated.
2. Tyres are not balanced.
3. Wheels are out of alignment.

ROTATE TYRES EVERY 5,000KM

1. Visit a reputable tyre shop or garage for tyre rotation.
2. Check your owner's handbook for rotating sequence.
3. Have your tyres balanced at the same time.

CHECK THE TREAD DEPTH INDICATOR

1. All tyres come with a tread depth indicator. (see diagram)
2. When the indicator is flushed with the rest of the tread (usually about 1.6mm), it is time to change the tyre.

CHECK THE WHEEL ALIGNMENT

1. Misaligned wheels cause tyres to wear more quickly and irregularly, and prevents the vehicle from running or braking in a straight line. The suspension and steering components will also be subjected to extra stress.
2. It is a good idea to have your wheels aligned by a computerised alignment machine. A reputable workshop should have the wheel alignment specifications of your vehicle model, overall diameter, and exhibit the same or higher Speed Symbol (SS)/Load Index (LI) of the original tyre as far as possible.

UNSAFE TREAD DEPTH

Ensure that tyres have more than 1.6mm of tread.

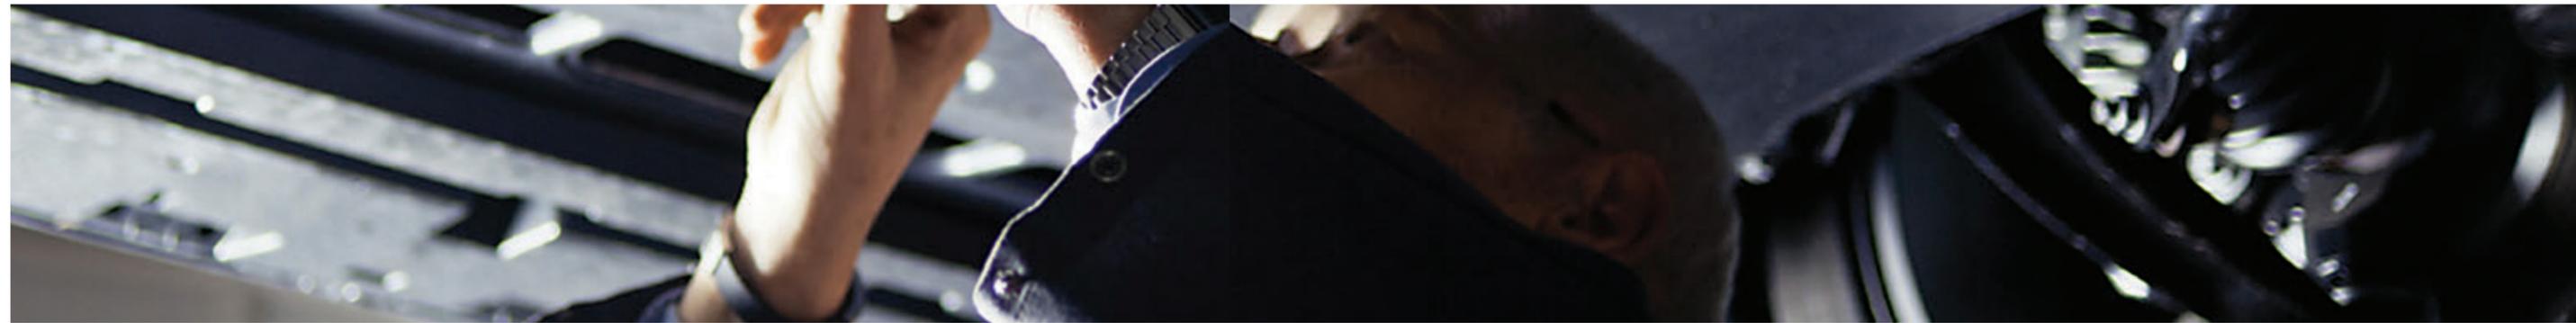

Most new tyres have about 8mm of tread when manufactured, but as a tyre wears, their ability to disperse water reduces. Tyres should be replaced before the tread wears down to the level of the Tread Wear Indicator.

The Tread Wear Indicators are moulded into all major grooves of tyres in at least four positions around the tyre. These indicators sit at least 1.6mm above the bottom of the grooves.

If you are unsure of how to read your tread depth correctly, visit your nearest Bridgestone stockist.

All conversion data is based on ETRTO

All the above approved rim widths and recommended inflation pressures are based on ETRTO except *TRA **JATMA

NOTES

1. This chart is based on the load per tyre. Please check the tyre dimensions before replacing tyres with different sizes
2. This chart does not imply complete interchangeability. Tyre interchangeability is not always possible due to "differences in rim sizes, tyre dimensions, load ratings, wheel-well clearances, vehicles handling and manufacturer's recommendations".
3. Always check the vehicle manufacturer's recommendations for tyre size options before replacing tyres with different sizes and/ or rim sizes.

GETTING THE BEST OUT OF YOUR TYRES

To Avoid Danger

INFLATING THE TYRES

- WARNING** • To avoid the danger from tyre bursting, keep appropriate distance from the tyre when inflating it; keep the tyre in a safety cage.
- CAUTION** • While assembling a passenger car tyre, maximum air pressure for the bead seating is 300kPa (3.0kgf/cm²); do not inflate the air over this pressure.
- Inflate the tyre to less than the bead seating pressure and after ascertaining that the both sides of the beads are mounted evenly on the flange of the rim, adjust the inflation to the recommended level.
- For T-type tyres, collapsible spare tyres, run flat tyres or other types of tyres specified by the manufacturer, follow the tyre manufacturer's instructions.

DAMAGED TYRES

- WARNING** • Do not use tyres that have cuts or cracks which reach the cords inside. The use of such tyres could lead to accidents. Consult with your tyre dealer to see whether repair is possible.

Maintaining Safety and Performance

CHOICE OF TYRES

- Basically, the standard tyres or optional tyres specified by the vehicle manufacturer should be used. When choosing other tyres, consult your dealer.
- Use the same tyre in type, structure and size to all wheels. In case where the vehicle manufacturer specifies tyres of different sizes for each axle, follow the vehicle manufacturer's instructions.
- CAUTION** • Do not use tyres of different type, structure or size on the same axle; differences in tyre performance could lead to accidents. (The T-type spare tyre is an exception to this).
- Use tubes and flaps marked with the same size as the tyre. And use valves which are appropriate for the vehicle and wheel.
- With a new tyre, use a new tube and flap.
- Consult with the dealer when choosing a wheel to suit the tyre size. For a tubeless tyre, be sure to use a tubeless tyre wheel.

CHECKING FOR FOREIGN OBJECTS OR DAMAGE

- CAUTION** • Check that the wheel is not cracked, deformed or markedly corroded.
- Check that there is no crack in the tyre and there is no nail, piece of metal, glass, etc., in the tyre. And make sure that there is no stone or other foreign object in the tread. If you find any foreign object, consult your tyre dealer to remove it.

MOUNTING THE TYRE / WHEEL

- In the case of tubeless tyre, air can leak out if there is any damage around the bead. Use Bridgestone-recommended lubricant when assembling the tyre on the wheel.
- Foreign objects or moisture inside the tyre could lower tyre performance. Before assembling the tyre to the wheel, check the inside of the tyre and remove any foreign objects or moisture.
- Water from the compressor can also get inside the tyre. Drain the compressor off regularly.
- CAUTION** • After the wheel assembly of a tubeless tyre, check that there is no leakage of air from the part between the tyre and the wheel hump or from the valve (Move the valve up and down and sideways to check).
- Be sure to adjust the wheel balance, in order to avoid vehicle vibration or uneven wear.
- Tyres which has side-protector should be fitted with the side-protector facing outside.
- If the tyre has rotation mark or instruction for assembling on its side-wall, please follow the information.
- CAUTION** • When a tyre is fitted to the vehicle, make sure that the tyre does not touch the body of the vehicle to avoid rupturing.
- Make sure that the tyre/wheel does not project over from the body of the vehicle.
- It is not recommended to mount the wheel in such a way that it projects over from fender. It is also recommended not to modify the fender or remodel the body of the vehicle.
- As for dual fitment, a large difference in diameter between the two tyres can cause early damage or uneven wear and have an adverse effect in terms of safety and economy. For dual fitment on a light truck, check that the difference in diameter is 6mm or less for radial tyres and 8mm or less for bias tyres. In case of mounting tyres which have allowed difference in diameter, mount the smaller wheel on the inside.
- Tighten the nuts and bolts with specified torque.

TYRE PRESSURE

- After inflating tyres to the correct pressure, check that there is no air leakage from the valve core, the rim or around the valve before putting on the valve cap.
- CAUTION** • Make sure to put on valve cap and tighten it appropriately.
- Check the air pressure regularly (once a month) using an air pressure gauge before moving the vehicle and when the tyre is cold. Adjust it to the pressure specified by the vehicle manufacturer or tyre manufacturer. Insufficient pressure can cause damage to the tyre or lead to accidents.
- Insufficient inflation pressure, particularly in a low-profile tyre, is not visually noticeable; always use an air pressure gauge to check the tyre pressure.
- During and after driving, the air pressure is high because of the heat. Never try to reduce the pressure while the tyre is hot.
- The air pressure specified by the car manufacturer is indicated somewhere near the door of the vehicle. If you cannot find them, consult with your car dealer or tyre dealer.
- In order for the tyres to provide their best performance, it is important that they are used at the correct inflation pressure. Usage of the tyres at an inappropriate pressure will lower its performance and cause tyre damage.
- Check the inflation pressure of the spare tyre regularly (once a year) and adjust it to the value specified by the vehicle manufacturer or tyre manufacturer.
- As for dual fitment, large difference in inflation pressure can cause early damage or uneven wear and have adverse effect in terms of economy and safety. Adjust the air pressure to the same level on both inside and outside tyre.

SPORTING ACTIVITY

- The instructions of 'Choice of tyres' and 'Tyre pressure' should be followed, even in case of sporting activities such as circuit racing (on-road tyres) or rallying (trail tyres).

LIMIT OF USAGE

- CAUTION** • A tyre is at its limit of use when the wear indicator becomes exposed, indicating tread depth of 1.6 mm. Replace the tyre with a new one before it reaches this stage. A worn tyre is dangerous; manoeuvrability deteriorated and the tyre becomes more likely to slip on a wet road.

SAFETY DRIVING

- CAUTION** • While driving, if you feel that the steering is unstable, or notice any abnormal sound or vibration, stop the vehicle in a safe place as quickly as possible then inspect both the vehicle and the tyres. Check that there is no deformation or other abnormality in the tyres. And even if there is no visible abnormality, continue your journey as slow as possible and have the tyres inspected by a tyre dealer.
- CAUTION** • Sudden starts, acceleration, turns and stops are all dangerous and should be avoided. On wet, snowy or frozen roads in particular, skidding is a potential danger that can lead to accidents. Drive in a manner suited to the road conditions.
- To avoid tyre damage, avoid riding over a curbstone, driving over sharp holes on the road surface, etc.
- CAUTION** • When driving, always keep a distance from the vehicle in front suited to the traffic speed. On wet, snowy or frozen roads in particular, be sure to keep a safe distance from the vehicle in front.
- When the type or size of tyre is changed from the original tyre, be sure to drive with care until you become accustomed to the new tyre's manoeuvrability.
NB: 'Type' here refers to different categories of carcass structure, tube/tubeless, speed symbol and tread pattern.
- To ensure safe driving, check that there is no crack in the valve core. If you find any cracks, consult with your tyre dealer. Also make sure the valve cap is closed tightly. Follow the car manufacturer's instruction when T-type tyre is used or run flat tyre has puncture.

BEAUTIFICATION AND PROTECTION

- If you use instant puncture repair agents or tyre shine agents, do not use any of them which have harmful effects on the tyre.
- When applying a tyre shine agent or rim assembly lubricant containing silicon or wax, take care not to get any of the substance on the surface of the tread (the part that grips the road). If any substance gets on the tread, drive extra carefully.

TYRE STORAGE

- Store tyres and tubes out of direct sunlight and rain, away from water and oil, sources of heat such as stoves and away from instruments which can produce electrical sparks.

TYRE ROTATION

- Wear of the tyres differs because of the position (drive axle or steering axle). To avoid abnormal vibration and noise, and to extend the tyre life, rotate the tyres with appropriate timing.
- Rotate the tyres regularly, including the spare tyre, in a proper manner suited to the conditions of the vehicle (Except T-type spare tyres).

OVERLOADING

- Overloading is not only a cause of damage to the tyres and shortened tyre life but it can also lead to cracking of the wheel. Avoid driving with the vehicle overloaded, also avoid unbalanced loading.

WHEEL ALIGNMENT

- If the wheels of a vehicle are out of alignment, it can cause poor maneuverability and abnormal wear. Check and adjust the wheel alignment at appropriate timing.

TYRE BRANDING

- Branding should be applied superficially near the rim line in order to avoid cracking from the branding area.

OTHERS

- Avoid using processed tyres as it can lead to accidents.

BRIDGESTONE
