

# SMART FLEX AH35

## Tyre structure

### Belt structure

Minimised motion of belts for reduced heat generation.

### Carcass

Optimised carcass structure for an improved ride and handling.

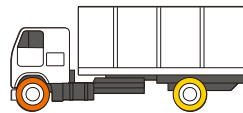

### Improved bead

Optimised bead profile for superior retreadability.

Hankook Tire & Technology

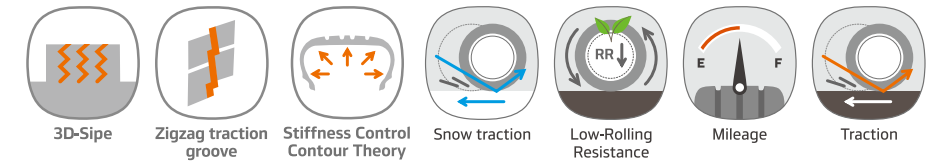

# SMART FLEX AH35

New all season tyre designed for variable road conditions

Special tread design and multi 3 dimensional sipes provide high mileage and enhanced traction performance on various road conditions.

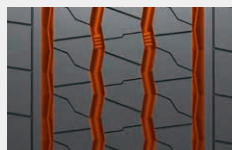

## Design features and technology

### Wide tread width

Wide tread width offers a high pattern volume which results in an improved mileage performance.

### 4 wavy and straight grooves

A combination of 4 wavy and straight grooves provides outstanding traction and drainage performance on long and regional haul multi-applications.

### Multi 3 dimensional sipes

Multi 3 dimensional sipes provide excellent traction leading to an enhanced driving performance. The rib's reliable stiffness results in significant fuel savings.

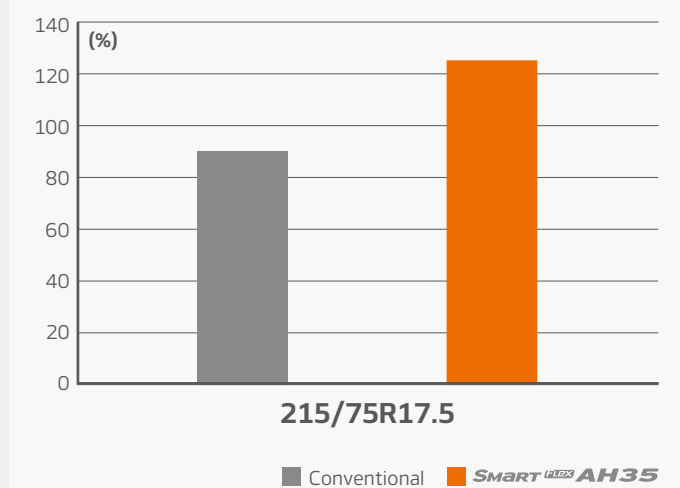

### Special tread pattern design with semi-sipes

Special tread pattern design with semi-sipes ensures even wear throughout the tyre's lifespan.

## Significant features and benefits summary

### Mileage field test result

### Key performance
