

Kinergy EX (H308)

European style for best performance

Kinergy EX is the combination of technology and design that offers drivers impressive vehicle fuel efficiency and outstanding performance.

Tire Pattern

Shoulder groove width design

- Optimized shoulder groove design helps to prevent unwanted road noise while driving.
- Groove width variation improves water drainage and maximizes wet condition performance.

Pitch design

An optimal 5 pitch tread design reduces noise.

New silica compound application

Rolling resistance is lowered through use of an advanced silica tread compound for improved vehicle fuel efficiency.

Optimal sipe design technology

Advanced tread block and sipe designs are incorporated for improved traction and comfort.

Vibration & noise technology

Unwanted noise and vibration are reduced by optimizing the tire's contact with the road surface.

VAI system

A Visual Alignment Indicator system allows drivers to check vehicle alignment by comparing tire's interior and exterior wear condition easily.

Optimal 4-grooves

An optimal 4 groove design improves wet condition braking and traction performance.

Tire Structure

High dispersion silica tread compound

- High dispersion silica compound provide excellent ride, noise performances & lower rolling resistance.

Wide 2 steel belt

- Wide 2 steel belt provides optimized foot shape & improved handling performance.

Super high turn up carcass

- Sidewall reinforced by super high turn up carcass line. Enhanced sidewall provides superior protection abilities form the impact damages.

High-hardness bead filler

- Ensures enhanced handling and steering response.

Strong single strand bead wire

- Strong bead wire provides improved uniformity and durability.

Rim protect bar

- High stiffness protector shape compound protect the rim surface from the various impacts.

Specification
