

Ventus S1 evo2 (K117A)

The best balance between wet and dry performance for premium SUV's

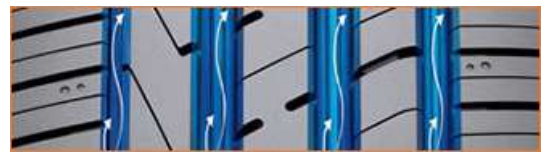

The Ventus S1 evo2 is a premium performance tire for SUV's that shortens braking distances in wet and dry conditions, enhances fuel efficiency based on lower rolling resistances whilst providing excellent grip and safety.

Tire Pattern

Aqua driving control

Providing superior wet performance through rapid drainage.

Triple driveline

As wear progresses down to TWI (tread wear indicator), there is no loss in performance.

Cooling system

Speeds up water drainage and improves heat radiation at high speed.

Intercooler

Controls excessive heat build up.

Alignment indicator

Drivers can check status of the vehicle alignment themselves through in / out wear check.

Tire Structure

High grip silica compound

- Improved dry/wet traction & lower rolling resistance.

Wide steel belt layer

- Better dry/wet handling.

High density rayon and polyester carcass

- Enhanced sidewall stiffness and durability.

High stiffness bead filler

- Better steering and handling response.

Strong single strand bead wire

- Improved uniformity & tire fitting.

Specification

Size	Labeling			Load Index	Speed Symbol
	Fuel Efficiency	Wet Grip	External Rolling Noise
